Coupled Problems 2013

V International Conference on Computational Methods for Coupled Problems in Science and Engineering

17 - 19 June 2013, Sta. Eulalia, Ibiza, Spain

An IACM Special Interest Conference

A CONFERENCE CELEBRATING THE 60th BIRTHDAY OF
EUGENIO OÑATE

<http://congress.cimne.com/coupled2013>

Objectives

The fifth conference on Computational Methods for Coupled Problems in Science and Engineering (Coupled 2013) will be organized on 17-19 June, 2013 in the island of Ibiza, Spain. The previous four editions of this conference were held on Santorini Island (Greece), on the islands of Ibiza (Spain) on 2007, Ischia (Italy) on 2009, on Kos (Greece) on 2011.

The objectives of Coupled 2013 are to present and discuss state of the art, mathematical models, numerical methods and computational techniques for solving coupled problems of multidisciplinary character in science and engineering. The conference goal is to make step forward in the formulation and solution of real life problems with a multidisciplinary vision, accounting for all the complex couplings involved in the physical description of the problem.

The conference will be included as one of the Thematic Conferences of the European Community on Computational Methods in Applied Sciences (ECCOMAS). It will also be supported by other scientific organizations in Europe and worldwide including the International Association for Computational Mechanics (IACM).

Coupled 2013 is dedicated to celebrating the 60th birthday of Eugenio Oñate.
