

**Rama Govindarajan, Tata Institute of Fundamental Research**

|                   |  |
|-------------------|--|
| <b>Talk title</b> | Droplet growth in clouds and what this does to turbulence  |
| <b>Biography</b>  | Rama Govindarajan is a Professor at the Tata Institute of Fundamental Research, in their International Centre for Theoretical Sciences, Hyderabad, India. She was previously on the faculty of the Jawaharlal Nehru Centre for Advanced Scientific Research and at the National Aerospace Laboratories, Bangalore. She received her Ph.D. from the Indian Institute of Science, Bangalore, and was a postdoctoral fellow at Caltech. She is a Fellow of the American Physical Society (Division of Fluid Dynamics), the Indian Academy of Sciences, Bangalore, and the National Academy of Sciences, Allahabad. She belongs to the Editorial Board of Physical Review Fluids. Her research interests are in viscosity- and density-stratified flows, instability and transition, particle-laden flows and vortex dynamics. |
