

Biographical Sketch

HECTOR GOMEZ received his PhD from University of A Coruña (Spain) in 2006.

He has been teaching and conducting research on Computational Mechanics since 2003, when he became Assistant Professor at University of A Coruña.

He was Visting Professor for one year at the University of Texas at Austin, and he is currently Associate Professor in the Department of Computational Mathematics at University of A Coruña.

His research interests include computational fluid mechanics, computational phase-field modeling, isogeometric analysis and tumor-growth modeling.

He has received the Juan C. Simo Young Investigator Award from SEMNI, the Spanish Society for Numerical Methods in Engineering.
