

Pierre LADEVEZE (ENS Cachan)

Pierre Ladevèze is a professor at Ecole Normale Supérieure in Cachan, France, and holds the EADS Foundation chair on “Advanced Computational Structural Mechanics”. He heads a research group of over forty researchers. His work focuses primarily on the validation and verification of models, on mechanics-based computational strategies for nonlinear problems and on the modeling and analysis of composite materials and structures. Pierre Ladevèze has co-authored over 180 papers published in international scientific journals and has supervised 75 PhD students.
