

Title:

Pneumatic Structures

Organizers:

Paolo Beccarelli, Faculty of Engineering, The University of Nottingham, UK
Javier Marcipar, CIMNE, Barcelona, Spain
Carles Estruch, Buildair, Barcelona, Spain

Abstract:

The invited session on pneumatic structures is focused on the role of architectural membranes in air-inflated and air-supported structures. The organizers welcome the submission of papers dealing with the design, manufacturing and installation of pneumatic structures. This includes project reports and research papers on new materials and manufacturing techniques, new design methods, environmental performance and the historic evolution of pneumatic structures.
