

**Ralf Herrmann** (Airbus) graduated from the University of Stuttgart with a degree in Aerospace Engineering. Since 1989, he has worked in R&T in the field of structures and materials for large aircraft and has managed several German national funded projects (in the frames of LuFo I to LuFo IV, Hybrid Laminar Flow flying test bed, composite fuselage). From 2006 until 2011 he led the EU-FP6 ALCAS Airliner Fuselage Platform. From 2011 to 2016 he was the Project Coordinator for EU-FP7 MAAXIMUS and from 2016 up to today he is leading the CleanSky2 Large Passenger Aircraft Multifunctional Fuselage Demonstrator. Since 2009 Ralf Herrmann chairs the Composite Design Criteria working group within the German Aeronautical Engineering Handbook LTH (Luftfahrttechnisches Handbuch).
